 Pioneer ARC

Key Selling Point

- Non-Stop Mix Play makes it quick and easy to enjoy simple, seamless music sequencing, Cool Flashing Color livens up the cabin with light pulsing to the beat of the music.
- Original Pioneer ARC for Android app lets you control and play various music sources and apps in your smartphone conveniently by operating Pioneer audio receiver or a smartphone.
- Cool, sleek new panel is designed to incorporate VA LCD display and fit perfectly into a 2-DIN space in the dash.

Main Features

- Pioneer ARC (Android)
- Direct Control for Certain Android Phones (USB)
- Media App Control for Android
- Multi-Language Display

Technologies

MIXTRAX

Pioneer applied its unique expertise to keep car entertainment flowing smoothly without interruption, so you can experience the intimate euphoria of listening to music that sounds as if a club DJ is there playing it.

* Depending on the file/song, sound effects may not be enabled for adding.

For Android Phone: All Audio Receivers Compatible with Certain Android Phones

- Use music apps stored in your iPod, iPhone or Android phone for listening through the car speakers.
- Fast forward and reverse can be operated through the receiver.
- Media App Control boots up as a music source for quicker access to iPod, iPhone or Android phone app control.

ADVANCE SOUND RETRIEVER

Hear the detail, warmth and clarity, the way the artist intended it, from all of your highly compressed MP3 and WMA files stored on USB device, iPod*, Android** phone and portable media players. By restoring data (especially higher frequencies) that tend to get lost in the digital compression process, Pioneer's Advanced Sound Retriever technology enhances audio reproduction nearly all the way up to 20 kHz frequencies.

Anti-Dust Design

Pioneer heat release structure can reduce ventilation holes & clearance gaps. The results are optimally efficient heat dissipation and prevention of entry of dust that can cause malfunction.

*The effect might change depending on the environment of the car.

Sound quality deterioration due to compressed audio file
