iPod classic*
iPod nano* (3rd, 4th, 5th, 6th, and 7th generation)

Notes: Receiver may not operate other iPod or iPhone models. Compatibility with unit and operations may vary depending on the software version.

Technologies

Spotify gives you instant access to millions of songs. With support for Spotify, you can control the Spotify app on your smartphone via your car receiver's touchscreen.

Support FLAC Codec

New Pioneer AV receiver supports dramatically superior car audio experiences with amazingly brilliant reproduction of sound by FLAC (Free Lossless Audio Codec) files that are 50-60% smaller than WAV files, yet retain the integrity of original sound sources. Characterized by 48 kHz sampling frequency and 24-bit bitrate, the sound quality of FLAC file playback exceeds even that of CD playback.

AppRadio MODE

With App Radio Mode, Pioneer has taken the technology from our revolutionary, game-changing App Radio and placed it in the AVH-X8750BT, so you can experience control of compatible Smartphone apps directly on your dash. When connected to an iPhone 6 Plus, iPhone 6, iPhone 5s, iPhone 5c, iPhone 5, iPhone 4s, iPhone4 or compatible Android smartphone with the correct interface cable (sold separately) and loaded with Pioneer's free App Radio application, you can enjoy full on-screen access and control of your contacts, calendar, maps, and more.

MIXTRAX

Enjoy your beats in an automatic non-stop mix or prepare mixes with the software or app. Mixtrax creates non-stop mixes of your tunes so you can hear your music a whole new way. It breathes new life into the music you already know well and makes the time you spend listening to music even more special. The experience that will change the way you listen to music begins here.

ADVANCE SOUND RETRIEVER

Hear more detail, warmth and clarity that the artist originally wanted you to hear from MP3, WMA and AAC files stored on your CD, USB Device, SD/SDHC Memory Card, iPod/iPhone, Android phone and portable media players. Pioneer's Advanced Sound Retriever technology benefits audio reproduction performance by enhancing data (especially high-frequency data) that tends to get lost in the digital compression process.

How to Use AppRadio Mode

AppRadio Mode (iPhone connectivity example shown)

Install the AppRadio app and other 3rd party apps to your iPhone.

After launching the app, connect your iPhone to the receiver using the AppRadio Mode compatible cable. Pressing the "MODE" button lets you change to the AppRadio Mode's Home display screen.

Through the display of the AV receiver, you can fully control apps compatible with AppRadio Mode.
