

Digital Media Receiver with Direct Control for
Certain Android Phones

MOSFET 50Wx4

Key Selling Point

• Shallow chassis depth allows for more flexibility in installation.

Main Features

- LCD Display
- FLAC Playback
- LED Backlight
- Direct Control for Certain Android Phones (USB)
- Bright USB Port (Front: High Current 1A Handling Capability)
- AUX Input (Front)
- MP3/WMA/WAV Playback
- MOSFET 50 W x 4
- RDS
- RCA Preout x 1 (2 V)
- 5-Band Graphic EQ
- Display Off Mode
- Illumination Timer
- Detachable Face Security™
- Rotary Volume Control
- USB Source Change Function

Technologies

SUPPORT FLAC CODEC

New Pioneer audio receiver supports dramatically superior car audio experiences with amazingly brilliant reproduction of sound by FLAC (Free Lossless Audio Codec) files that are 50–60% smaller than WAV files, yet retain the integrity of original sound sources. Characterized by 48 kHz sampling frequency and 24-bit bitrate, the sound quality of FLAC file playback exceeds even that of CD playback.

* For the files stored in USB thumb drive.

For Android Phone: All Audio Receivers Compatible with Certain Android Phones

- Use music apps stored in your Android phone for listening through the car speakers.
- Fast forward and reverse can be operated through the receiver.
- Media App Control boots up as a music source for quicker access to Android phone app control.

SEPARATED DIMMER SETTING

Brightness of main display and brightness of key illumination zones can be adjusted independently of each other, to levels from 1 to 10.

PRESET STEERING WHEEL CONTROL

You can now use buttons on your car steering wheel to control certain car receiver functions. Setup is simple. Just choose your car brand name in the receiver's PRESET setting interface to automatically ensure compatibility of your vehicle's original steering wheel controller with the system.
