Subwoofer Technology

IMPP Composite Seamless Cone

An extremely rigid yet lightweight cone is vital to prevent cone failure at high sound pressure levels. Pioneer's IMPP Composite Seamless Cones meet this need perfectly.

Drive Cone for Louder Sound

Fiber material blended in the drive cone improves sound response.

Highly Rigid Shaped Basket

Four ribbed arms strengthen the basket stiffness while body basket shape has been slimmed down.

More Rigid Basket!

Louder Bass!

Air Vent

The movement of air within the subwoofer is smoothly channeled for optimal ventilation to ensure a quick response and clear reproduction of bass.

Large-Sized Magnetic Circuit and Projected Pole

A large magnetic circuit and projected pole that brilliantly dissipates heat help to deliver higher power sound.

The projected pole helps reproduce more accurate, linear sound by improving the symmetry of vertical magnetic flux distribution.

Dual-Layer Surround Fiber Reinforced Elastic Polymer

Dual Spider

Two spiders supporting the voice coil effectively dampen large cone vibration and enhance linearity of sound reproduction.
