iPod classic*
iPod nano* (3rd, 4th, 5th, 6th, and 7th generation)

Notes: Receiver may not operate other iPod or iPhone models. Compatibility with unit and operations may vary depending on the software version.

Technologies

Android Auto extends the Android platform into the car in a way that's purpose-built for driving.

Apple CarPlay is the safer, smarter and more fun way to use your iPhone in the car. It launches automatically by just plugging in.

AUTO TIME ALIGNMENT

Time Alignment automatically estimates the delay from each speaker to driver's position and adjusts speaker output timing, so that sound from all speakers reaches the driver's ears in perfect sync.

AppRadio MODE

With App Radio Mode, Pioneer has taken the technology from our revolutionary, game-changing App Radio and placed it in the AVH-X8750BT, so you can experience control of compatible Smartphone apps directly on your dash. When connected to an iPhone 6 Plus, iPhone 6, iPhone 5s, iPhone 5c, iPhone 5, iPhone 4s, iPhone4 or compatible Android smartphone with the correct interface cable (sold separately) and loaded with Pioneer's free App Radio application, you can enjoy full on-screen access and control of your contacts, calendar, maps, and more.

ADVANCE SOUND RETRIEVER

Hear more detail, warmth and clarity that the artist originally wanted you to hear from MP3, WMA and AAC files stored on your CD, USB Device, SD/SDHC Memory Card, iPod/iPhone, Android phone and portable media players. Pioneer's Advanced Sound Retriever technology benefits audio reproduction performance by enhancing data (especially high-frequency data) that tends to get lost in the digital compression process.

Bluetooth®

Bluetooth Wireless Technology makes hands-free operation comfortable and safe while driving.

MIXTRAX

Enjoy your beats in an automatic non-stop mix or prepare mixes with the software or app. Mixtrax creates non-stop mixes of your tunes so you can hear your music a whole new way. It breathes new life into the music you already know well and makes the time you spend listening to music even more special. The experience that will change the way you listen to music begins here.

MirrorLink™

By using the optional cable CD-MU200, you can directly access music, maps, and contacts on select MirrorLink™ certified devices via USB directly from the receiver's touchscreen.
