iPhone SE
iPhone 6s Plus, iPhone 6s, iPhone 6 Plus, iPhone 6
iPhone 5s, iPhone 5c, iPhone 5

Notes: Receiver may not operate other iPod or iPhone models. Compatibility with unit and operations may vary depending on the software version.

Technologies

TWO-PHONE FULL TIME CONNECTION

You can connect two mobile phones (for personal and business use, for example) with the receiver, and an incoming call from either phone can be received without requiring manual switching.

USB QUICK CHARGE FOR ANDROID™ (CDP)

Pioneer's new audio receiver has a charging downstream port (CDP) providing up to 1.5 amperes to give an Android smartphone a quick charge.

## Dynamic Bass Enhance

New Pioneer Audio Receivers enrich bass depth and use Pioneer original technology to provide more dynamic, punchy sound.

### REPRODUCTION OF MISSING FUNDAMENTALS

The unique audio processing restores fundamental qualities that may be missing from the original sound, allowing you to hear bass sound quality that surpasses the depths of low-frequency sound that speakers can actually emit. From even small speakers, you can feel the impression of heavy bass that you typically hear from larger speakers.

### EMPHASIZING KICK SOUND

By increasing specific amplitude, you can experience the kick sound sensation of punchy beat.

## 13-Band Graphic EQ

With the 13-Band Graphic Equalizer, you will be able to adjust acoustic settings in greater detail, according to your preferences.

## Pioneer ARC

Pioneer ARC

Original Pioneer ARC app lets you control and play various music sources and apps in your smartphone conveniently by operating Pioneer audio receiver or a smartphone (iPhone/iPod touch/Android device).

Accordingly, you can see Text Information, operate File/Folder/Browse, Streaming App Playback, Music Browser functions and listen to get the best out of your receiver by easily adjusting your EQ Settings, Crossover and Time Alignment all through your Smartphone with Pioneer ARC!

## Main Specifications
