Pioneer

AVH-Z9150BT

In-Dash Double-DIN DVD Multimedia AV Receiver with 7" WVGA Touchscreen Display, Built-in Wi-Fi for Wireless CarPlay and Android Auto Wireless, Dual USB, SD Card Slot., AppRadio Mode+, Built-in Bluetooth and Full HD Video Playback from USB Device

Key Selling Point

- With built-in Wi-Fi®, you can use Wireless Apple CarPlay and Android Auto Wireless — the best means of operating a smartphone through a car entertainment system — without connection cable, for greater freedom from clutter and complication.
- Through the receiver display, you can seamlessly access various audio and video content stored in a wirelessly connected smartphone by using Wireless Mirroring function.
- Fully refined "Simple and Easy"-inspired interface provides more flexible, easy operation and more engaging user experience.

Technologies

Wireless Apple CarPlay ™   NEW

Wireless Apple CarPlay is a smarter, safer way to use your iPhone® in the car that allows you to stay focused on the road and get directions, make calls, send and receive messages, and listen to music. Just wirelessly connect your iPhone and go.

Works with Apple CarPlay

Note: Apple CarPlay is available on iPhone 5 or later. For compatibility and available features, please visit the official Apple CarPlay website at http://www.apple.com/ios/carplay/

Android Auto ™ Wireless   NEW

Android Auto Wireless creates a seamless wireless experience for drivers by simplifying connectivity in the car.

Android Auto Wireless

Android Auto automatically brings you useful information and organizes it into simple cards that appear just when they're needed.
It's designed to minimize distraction so you can stay focused on the road ahead.

Notes: Android Auto Wireless is available with Android phone running Android 8.1 (Oreo) or higher with a data plan.
Availability of Android Auto and Android Auto Wireless may vary depending upon your country and phone model. Please visit android.com/auto for more information.

Wireless Mirroring `NEW`

Wireless Mirroring function displays a wirelessly connected smartphone which is compatible with the function on the receiver display, and touch operation* of this display makes it easy to share various content stored in the smartphone with other passengers.
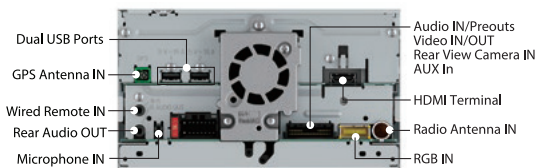

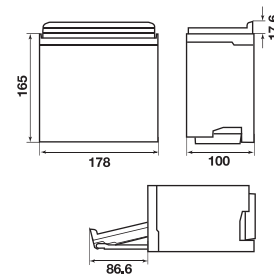

Touch operation differs among compatible smartphones.
