HIGH POWER & FORCEFUL BASS

Tougher at handling more high power input at higher volume without compromising higher quality.

Dual Spiders and Motor Assembly is the driving force of massive dynamic sound that's true to the Champion Series name.

HIGH RESOLUTION SOUND

Hi-Res
AUDIO

OPEN &
SMOOTH™

Wider frequency range, resulting from the tweeter's optimal aluminium diaphragm shape and Vertex Drive System, enriches and expands sound field presence in the car cabin.

Dynamic range is widened, thanks to the speaker's light, rigid Aramid fiber cone, superior linearity and low distortion.

DESIGNED FOR HI-RES AUDIO

The quality of music recordings available to listeners has evolved. Hi-Res Audio recordings contain significantly more data compared to a standard CD recording and require a loudspeaker that is capable of smoothly reproducing frequencies of 40kHz or higher. Speakers with Hi-Res Audio are designed to deliver sound that's clearer, sharper and more complex - reproducing music that is closer to the original performance.

A surface containing mica properly maintains the cone's superior rigidity and internal loss. The back makes excellent use of light, water-resistant material. Various materials were carefully combined to develop a diaphragm of extra lightness and rigidity to reproduce sound clearly with outstanding responsiveness, sensitivity and a suitable degree of internal loss.

OPEN & SMOOTH

Pioneer's OPEN & SMOOTH sound concept provides a seamless and smooth transition between the midrange and tweeter drivers and delivers uniform off-axis frequency response optimized for automotive applications where one or more speakers are often aimed away from the listeners' ears.

An extremely rigid yet lightweight cone is vital to prevent cone failure at high sound pressure levels. Pioneer's IMPP Composite Cones meet this need perfectly. CAE (computer-aided engineering) has been applied to create a surface spoke design that ensures high durability and rigidity of the cone..

Message from the President

Pioneer started as a speaker manufacturer in 1938. Since its founding as a Pioneer Group company in 1966, Tohoku Pioneer has been expanding its speaker-based business to deliver a wide variety of products to people around the world. Today our diverse line of products includes top-of-the-line TAD-branded speakers and hi-fi components, as well as in-car speakers designed to bring immersive entertainment experiences. Every one of these products is built with our industry-leading expertise in product development, engineering, and manufacturing.

What has driven us to where we are today is the Pioneer Group's shared philosophy of "Move the Heart and Touch the Soul." Under this philosophy, all of us at Tohoku Pioneer have been honing our prowess and competitive advantages in sound technologies and relentlessly pursuing ways to take sound solutions to the next level.

Tohoku Pioneer is committed to continuing to offer best-in-class products that deliver a higher level of emotionally uplifting experiences to people around the world.

A handwritten signature in black ink, appearing to read "N. Takashima", with a long horizontal flourish extending to the right.

Naoto Takashima

Representative Director
President and CEO
